

Hi, my name is Angela Coustillac and I'm running for junior class vice president. I currently take part in lacrosse and soccer and enjoy playing in the band. My ultimate goal for the future is to help this already good school become great. I feel that I am a responsible, young woman that has a lot to bring to Mentor. I am confident in everything I do and always finish what I start. I fight for what I believe in, but will take criticism well when I know I am wrong. More specific goals that I have for the future include the following. I would like to see a tutoring program start at Mentor. There are many difficult classes at school and I feel that the students deserve the privilege to get help in those classes. Students that have already taken the class and done well will get service hours for tutoring students that feel they want or need the help. Another goal I have for next year is to start a Make a Difference Committee. Each club, department, and team will have a spokesperson that will report what is going on in the group they represent. They spokespeople will meet once a month and one person from the meeting will go to board and trustee meetings to inform the city on what is happening at Mentor High. I feel that this will allow the community to see what their tax dollars are going towards and how much Mentor has to offer. I am always open for suggestions and comments. I ask that you take the time to consider me and what I have to offer. Remember, for Mentor to be a better place, vote Angela to win the race.
